

What makes us the world's *premier medical access membership* over other concierge / boutique models?

1 The Physicians.

The Team Doctors all share one unified mark of distinction. They were hand chosen by the team owners and leadership of billion-dollar professional sports franchises to diagnose and care for their multi-million dollar athletes, because of their demonstrated expertise, respect from their fellow colleagues, and reputations as premier physicians in their communities.

Our physicians did not apply for their positions as the head doctors within these professional sports franchises. Most of these physicians are highly skilled family practitioners and internists capable of caring for and navigating you to elite specialists on an expedited basis depending on the need across the country and around the globe.

2 The Network.

Our network has developed over twenty years of these team physicians coordinating care on behalf of professional athletes and high profile individuals. For example, a team physician in Atlanta can easily make a phone call to a fellow peer in Los Angeles, New York, Chicago, Miami, or just about any other major city on behalf of a professional athlete or you, a member.

In essence, the network has been tested and developed through over 20 years of coordinating care at the highest levels. As a member, you gain instant trust and confidence knowing you are in great hands with this network, because of their experience and expertise.

3 No Limitations.

There is no other medical access, concierge, or boutique medical membership that offers the distinction and reach of this network.

Limitations of Other Concierge & Boutique Medical Memberships:

A. Local Memberships:

Members are usually limited to one or a handful of doctors locally.

B. National Memberships:

The doctors in the concierge medical/boutique membership network were simply bought out by a conglomerate without any prior experience in working with or prior knowledge of the other doctors in their membership network.

C. Advocacy or list based memberships:

The doctors aren't directing the care. The care of members in some of these services are actually directed by administrators based off of lists of doctors.

The Team Doctors Difference:

Our members receive expedited access to distinguished physicians locally and across the country. These physicians all know of each other, and of other elite specialists based on peer to peer relationships. Our physicians are directing your care, not medical administrative personnel based on lists.

There is No Substitute:

The Team Doctors network is not an artificial network assembled and purchased by an outside company where the physicians do not personally know each other. That is why when we say that you can't replicate this network, you really can't. There is only one physician network at this level in the world.
